AVAILABLE NOW

ZPHYRE BESPOKE

YOUR BUSINESS.

A SYSTEM BUILT AROUND IT.

A custom operating system connecting your people, processes and information - designed around how your company actually works.

A DIVISION OF ZPHYRE ONE

CUSTOM OPERATING SYSTEMS

01

YOUR BUSINESS GREW. YOUR SYSTEMS DIDN'T.

Spreadsheets, messages and manual follow-ups can keep work moving. As the business grows, the owner needs a clear view of what happened, what is delayed and who acts next.

01 / VISIBILITY

See where work stands.

Client history, live orders, pending approvals and outstanding payments connected to the work they belong to.

02 / OWNERSHIP

Know who acts next.

Assign responsibilities, follow-ups and reminders so important work has a clear owner and a visible next step.

03 / CONTROL

Keep the company aligned.

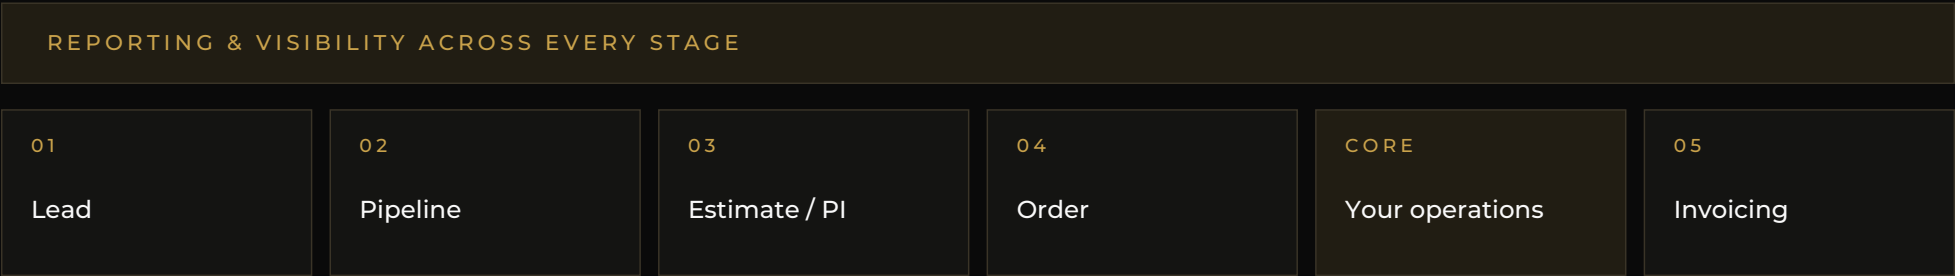

Give each team the access it needs, while management can see progress, delays and exceptions across the business.

A good fit for founder-led businesses whose workflows cross teams and need company-specific rules, approvals or integrations.

THE SAME BEGINNING. THE SAME END.

A MIDDLE BUILT FOR YOU.

Your business is mapped in Discovery. The operating core follows the work, using your team's own language.

THE OPERATING CORE, IN YOUR LANGUAGE

Manufacturing	Purchase	Production	Dispatch
Trading & distribution	Procurement	Stock	Fulfilment
Design & architecture	Procurement	Site execution	Handover

Illustrative workflows. Final stages, documents and integrations are defined in your agreed project scope.

ONE COMPANY. DIFFERENT TEAMS.

ONE CONNECTED SYSTEM.

We select the capabilities your workflow needs. Your proposal defines exactly what will be built.

01

Clients & sales

Client bank, contact history, opportunities, quotations and follow-ups.

02

Orders & delivery

Live jobs, milestones, approvals, purchasing, production or service delivery.

03

Tasks & people

Assignments, recurring work, employee records and agreed HR workflows.

04

Money & stock

Invoices, receipts, receivables, expenses, inventory and stock movement.

05

Reporting

Management views of progress, performance, delays and exceptions.

06

Connections

Selected existing tools, controlled external access and optional WhatsApp workflows.

Your identity. Your access rules. Your logo, colours and internal language, with user logins and Super Admin permissions. Integration feasibility and third-party charges are assessed in Discovery.

UNDERSTAND FIRST. BUILD SECOND.

01 Free Discovery

A conversation about your business, its bottlenecks, existing tools and the visibility you need.

02 Solution Blueprint

The proposed workflow, capabilities, roles, integration feasibility, timeline and commercial proposal.

03 Personalised prototype

Your identity and key workflow on a simple prototype, so you can see the proposed direction.

04 Approval & start

Scope, agreement, confidentiality terms and an authorised client contact. Work starts after the advance.

05 Build & handover

Build, review and acceptance against scope. The full project fee is paid before final handover or go-live.

06 Warranty & continuity

A 30-day warranty for agreed-scope corrections, followed by continuing hosting and maintenance.

Free Discovery carries no obligation. One authorised contact on each side keeps decisions and feedback clear.

SCOPED, THEN QUOTED ONCE.

A starting investment, followed by one proposal for your business. Final pricing and timeline depend on workflows, users and complexity.

CUSTOM BUILD / ONE TIME / FROM

₹ 1,50,000

Configured to the approved workflow and scope.

HOSTING & MAINTENANCE / FROM

₹10,000 / month
or ₹1,00,000 / year

BUILD PAYMENT MILESTONES

50%

At commencement

30%

Defined working milestone

20%

Before handover / go-live

Optional: team training ₹7,000/session; WhatsApp integration ₹15,000 where feasible. Meta, API, platform and usage charges are additional. Future changes and upgrades are scoped separately.

All prices exclude applicable GST. Published base hosting tier; final recurring charges are confirmed in the proposal.

CLEAR SCOPE. A CLEAR RELATIONSHIP.

INCLUDED AT HANDOVER

Assisted setup within scope, configured user roles, launch preparation and a client-specific PDF guidebook.

30-DAY WARRANTY

Corrections and reasonable adjustments within the agreed scope. New features and material scope changes are separately assessed.

ONGOING CONTINUITY

Recurring hosting and server maintenance, with periodic backups as part of the agreed hosting environment.

YOUR BUSINESS DATA

Your data remains yours. Permissions, confidentiality and the export process are defined in the agreement.

A CLEAR EXIT

Thirty days' written notice, normal hosting charges during that period and a data export before access closes. No exit penalty.

SCOPE BOUNDARIES

Bulk data entry, historical data migration and generic retainerships are not included. Native app-store apps are outside the standard offering.

Your proposal is the reference for deliverables, acceptance, integrations and ongoing service.

WHAT'S THE BIGGEST HICCUP IN YOUR BUSINESS?

Tell us how work moves through your company. We will recommend the workflow, scope and next step for your Zphyre Bespoke system.
